

Rhyolite Decorative Stone

Rhyolite is a fine grained, silica rich igneous (or volcanic) rock. Rhyolite is generally light in colour, which gives it certain appeal as a concrete aggregate and landscape dressing. Due to its high quartz content, it is particularly hard wearing.

At Hunter Quarries, we offer 5 standard Rhyolite products.

7mm Aggregate

10mm Aggregate

14mm Aggregate

Dust

20FCR (Fine Crushed Rock)

Typical Use Cases

- Garden and landscape dressing (7mm, 10mm, 14mm, Dust)
- Decorative road base e.g. driveways (20FCR)
- Decorative concrete aggregate (7mm, 10mm, Dust)
- Asphalt additive - due to its high polished aggregate friction value (PAFC). TfNSW specified product.
