## 1. INTRODUCTION

This report has been completed to meet the requirements of Section 66(6) of the *Protection of the Environment Operations Act 1997* and the NSW Environmental Protection Authority's (EPA) Requirements for Publishing Pollution Monitoring Data (October 2013). This report summarises the required monitoring data under Environmental Protection Licence (EPL) 20611 for the Karuah East Quarry. This report also includes some monitoring requirements under Project Approval 09\_0175 and the approved Statement of Commitments (SoC).

A summary of the environmental data for December 2018 is covered in this report.

A summary of the licence information is provided in **Table 1** below.

## 2. DUST MONITORING

There are no specific dust criteria listed in the EPL, but the dust criteria (Tables 2-4) are listed in Schedule 3 Condition 13 of Project Approval 09\_0175.

**Table 2 PA 09\_0175 Long term impact assessment criteria for particulate matter**

| Pollutant                          | Averaging period | <sup>4</sup> Criterion            |
|------------------------------------|------------------|-----------------------------------|
| Total suspended particulates (TSP) | Annual           | <sup>1</sup> 90 µg/m <sup>3</sup> |
| Particulate matter < 10 µm (PM10)  | Annual           | <sup>1</sup> 30 µg/m <sup>3</sup> |

**Table 3 PA 09\_0175 Short term impact assessment criteria for particulate matter**

| Pollutant                         | Averaging period | <sup>4</sup> Criterion            |
|-----------------------------------|------------------|-----------------------------------|
| Particulate matter < 10 µm (PM10) | Daily            | <sup>1</sup> 50 µg/m <sup>3</sup> |

**Table 4 PA 09\_0175 Long term impact assessment criteria for Deposited Dust**

| Pollutant                   | Averaging period | Maximum increase in deposited dust level | Maximum total deposited dust level     |
|-----------------------------|------------------|--|--|
| <sup>3</sup> Deposited dust | Annual           | <sup>2</sup> 2 g/m <sup>2</sup> /month   | <sup>1</sup> 4 g/m <sup>2</sup> /month |

**Notes to Tables 2-4:**

<sup>1</sup> Total impact (ie incremental increase in concentrations due to the project plus background concentrations due to all other sources).

<sup>2</sup> Incremental impact (ie incremental increase in concentrations due to the project on its own).

<sup>3</sup> **Deposited dust** is to be assessed as insoluble solids as defined by Standards Australia, AS/NZS 3580.10.1:2003: Methods for Sampling and Analysis of Ambient Air – Determination of Particulate Matter – Deposited Matter – Gravimetric Method.

<sup>4</sup> Excludes extraordinary events such as bushfires, prescribed burning, dust storms, sea fog, fire, incidents, illegal activities or any other activity agreed by the Secretary in consultation with EPA.

All dust monitoring is undertaken in accordance with the *Approved Methods of Sampling and Analysis of Air Pollutants in NSW* (EPA, 2007).

Dust deposition and TSP/PM<sub>10</sub> monitoring is undertaken at Karuah East Quarry at the locations listed in **Table 5**.

## 2.3 Dust Monitoring Results Summary

All dust monitoring results to the end of December 2018 indicate that the Dust Deposition (Insoluble Solids), TSP and PM10 levels recorded were below the project criterion.

## 3. BLAST MONITORING RESULTS

The conditions stipulated for blasting is referred to in Condition L5 and M7 of EPL 20611 and Schedule 3, Condition 8 of PA 09\_0175. Blast monitoring is undertaken at every blast. **Table 8** summarises the blast monitoring criteria.

**Table 8** Blasting criteria

| Location  | Airblast overpressure (dB(Lin Peak)) | Ground vibration (mm/s) | Allowable exceedance  |
|---|--------------------------------------|-------------------------|---|
| Any residence on privately-owned land, or any public infrastructure | 120                                  | 10                      | 0%  |
|   | 115                                  | 5                       | 5% of the total number of blasts over a period of 12 months |

Summary of blasting results are shown in **Table 9**.

**Table 9** Blast Monitoring Results

| Date and time   | Overpressure and vibration | Location B (Nearest Residence) |
|---|----------------------------|--------------------------------|
| <i>Blasting was not carried out in December 2018.</i> |                            |                                |

## 4. NOISE MONITORING

Schedule 3 Condition 3 of the Project Approval and Condition L4.1 of the EPL requires Karuah East Quarry to ensure noise generated by Quarry operations does not exceed criteria outlined in **Table 10**.

**Table 10** Operational Noise Criteria (dB(A) LA<sub>eq(15min)</sub>)

| Location                        | Criteria ( <sup>1</sup> day) |
|---------------------------------|------------------------------|
| Residence on Lot 11 DP 10244564 | 43                           |
| A                               | 40                           |
| B                               | 37                           |
| G                               | 38                           |
| All other residence             | 35                           |

**Note <sup>1</sup>:** A day is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sunday and Public Holidays.

The noise criteria shown in **Table 10** is not indicative of the construction noise criteria for the Karuah East Quarry project. Construction noise criteria has been developed based on the *NSW EPA Interim Construction Noise Guideline* for each location and is set out in Table 9 of the approved [Noise Management Plan \(SLR, 2015\)](#).

In accordance with Schedule 3 Condition 5 and Condition 7 of the Project Approval and the [Noise Management Plan \(SLR, 2015\)](#) a noise monitoring program has been implemented. Summary of this monitoring program is outlined in **Table 11**.

**Table 11 Noise Monitoring Program**

| <b>Construction Noise Monitoring</b> |                             |  |   |
|--------------------------------------|-----------------------------|--|---|
| <b>Monitoring Method</b>             | <b><sup>1</sup>Location</b> | <b>Frequency</b>   | <b><sup>2</sup>Criteria (dB(A) LA<sub>eq(15min)</sub>)</b>      |

| Unattended noise monitoring          | G                           | Quarterly  | As per Table 10, 12 and 13 <a href="#">Noise MP (SLR, 2015)</a> |

- Note:**
1. Monitoring locations are shown in Appendix 1.
  2. Criteria is for daytime limits. Daytime is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sunday and Public Holidays.

**Noise monitoring was not required in December 2018. The most recent monitoring was undertaken in November 2018.**

## 5. SURFACE WATER MONITORING

Condition M2 of the EPL outlines the requirement to monitor surface water discharges from Karuah East Quarry via the three licensed discharge points (LDP001, LDP002, LDP003). The *Statement of Commitments* (Appendix 6, PA 09\_0175) requires additional surface water monitoring to be undertaken for the first twelve months of operations. This additional water monitoring requires monthly sampling to be undertaken at the three licensed discharge points and at four locations on Yalimbah and Bulga Creeks when in flow.

All discharged water from the three licensed discharge points are required to meet the water quality concentration limits as stipulated in Condition L2.4 of the EPL. This criterion is shown in **Table 12** below.

**Table 12 Surface Water Discharge Monitoring Criteria**

| <b>Sampling Points</b> | <b>Pollutant</b> | <b>Unit</b> | <b>EPL Limit</b>      |
|------------------------|------------------|-------------|-----------------------|
| LDP001 (Dam 1)         | pH               | pH units    | 6.5 – 8.5             |
| LDP002 (Dam 2)         | TSS              | mg/L        | 40                    |
| LDP003 (Dam 3)         | Oil & Grease     | mg/L        | 5 and/or none visible |

## 5.1 Discharge Monitoring Results

A single controlled discharge occurred at Dam 2 on the 4<sup>th</sup> December. Discharge monitoring results shown in **Table 13** below.

## 5.2 Monthly Monitoring Results

Monthly water sampling was undertaken on the 18 December 2018.

Summary of monthly monitoring results is shown in **Table 14** and **Table 15**.

### 5.3 Surface Water Results Summary

A single controlled discharge occurred on the 4<sup>th</sup> December at Dam 2. The pH, TSS and Oil Grease were within the EPL criterion for discharge.

The monthly water monitoring that was conducted on the 18 December shows that the TSS values were higher in compared the previous months at all monitoring points. The TSS was shown to be as high as 341mg/L at Dam 3, which was more than 8 times the EPL criterion for discharge. The decreased water quality was due to recent rain at the time of sampling. As there was no uncontrolled discharges during December 2018, a non-compliance did not occur.

## 6. GROUNDWATER MONITORING

Groundwater monitoring is undertaken to meet the *EA Statement of Commitments* (Appendix 6, PA 09\_0175) and Section 8.2 [Water Management Plan \(SLR, 2015\)](#). Groundwater levels are monitored quarterly and water quality biannually at four groundwater monitoring bores (piezometers). Details of this monitoring program is shown in **Table 16**. Refer to Appendix 1 for piezometer locations.

**Table 16 Groundwater Monitoring Program**

| Piezometer         | Location         | Water Level<br>monitoring frequency | Water Quality<br>monitoring frequency |
|--------------------|------------------|-------------------------------------|---------------------------------------|
| <sup>1</sup> BH205 | Lot 13/DP1024564 | Quarterly                           | Biannually                            |
| <sup>2</sup> BH207 | Lot 13/DP1024564 | Quarterly                           | Biannually                            |
| BH208              | Lot 21/DP1024341 | Quarterly                           | Biannually                            |
| BH303              | Lot 21/DP1024341 | Quarterly                           | Biannually                            |

**Note:** 1. Piezometer BH205 was relocated approximately 30m to the west on 13 March 2017  
2. Piezometer BH207 was relocated approximately 60m to the north on 26 September 2016.
