1. INTRODUCTION

This report has been completed to meet the requirements of Section 66(6) of the *Protection of the Environment Operations Act 1997* and the NSW Environmental Protection Authority's (EPA) Requirements for Publishing Pollution Monitoring Data (October 2013). This report summarises the required monitoring data under Environmental Protection Licence (EPL) 20611 for the Karuah East Quarry. This report also includes some monitoring requirements under Project Approval 09_0175 and the approved Statement of Commitments (SoC).

³ **Deposited dust** is to be assessed as insoluble solids as defined by Standards Australia, AS/NZS 3580.10.1:2003: Methods for Sampling and Analysis of Ambient Air – Determination of Particulate Matter – Deposited Matter – Gravimetric Method.

⁴ Excludes extraordinary events such as bushfires, prescribed burning, dust storms, sea fog, fire, incidents, illegal activities or any other activity agreed by the Secretary in consultation with EPA.

All dust monitoring is undertaken in accordance with the *Approved Methods of Sampling and Analysis of Air Pollutants in NSW* (EPA, 2007).

Dust deposition and TSP/PM₁₀ monitoring is undertaken at Karuah East Quarry at the locations listed in **Table 5**.

2.3 Dust Monitoring Results Summary

All dust monitoring results to the end of February 2019 indicate that the Dust Deposition (Insoluble Solids), TSP and PM10 levels recorded were below the project criterion.

On the 19th of February, the TSP results were elevated due to widespread dust across the region caused by a natural meteorological event. As a result of this high reading, the average TSP results for the month were more elevated than previous months but the TSP average value was still lower than the project criterion.

3. BLAST MONITORING RESULTS

The conditions stipulated for blasting is referred to in Condition L5 and M7 of EPL 20611 and Schedule 3, Condition 8 of PA 09_0175. Blast monitoring is undertaken at every blast. **Table 8** summarises the blast monitoring criteria.

Table 8 Blasting criteria

Location	Airblast overpressure (dB(Lin Peak))	Ground vibration (mm/s)	Allowable exceedance
Any residence on privately-owned land, or any public infrastructure	120	10	0%
	115	5	5% of the total number of blasts over a period of 12 months

Summary of blasting results are shown in **Table 9**.

4. NOISE MONITORING

Schedule 3 Condition 3 of the Project Approval and Condition L4.1 of the EPL requires Karuah East Quarry to ensure noise generated by Quarry operations does not exceed criteria outlined in **Table 10**.

Table 10 Operational Noise Criteria (dB(A) LA_{eq(15min)})

Note 1: A day is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sunday and Public Holidays.

The noise criteria shown in **Table 10** is not indicative of the construction noise criteria for the Karuah East Quarry project. Construction noise criteria has been developed based on the *NSW EPA Interim Construction Noise Guideline* for each location and is set out in Table 9 of the approved [Noise Management Plan \(SLR, 2015\)](#).

In accordance with Schedule 3 Condition 5 and Condition 7 of the Project Approval and the [Noise Management Plan \(SLR, 2015\)](#) a noise monitoring program has been implemented. Summary of this monitoring program is outlined in **Table 11**.

4.1 Operator Attended Monitoring Results

The results of the operator attended noise surveys are presented in **Table 12**. Ambient noise levels given in the tables include all noise sources such as traffic, insects, birds, adjacent quarry and Karuah East Quarry. The table provides the following information:

- Monitoring location and serial number of the noise logger;
- Date, start time, Wind velocity (m/s) and Temperature (°C) at the measurement location; and
- Typical maximum (LA_{max}) and contributed noise levels.

Quarry contributions listed in the tables are from Karuah East Quarry and are stated only when a contribution could be quantified.

4.3 Noise Monitoring Summary

The attended noise monitoring that was conducted during February 2019 shows that the Karuah East Quarry was not audible at location F and G.

5. SURFACE WATER MONITORING

Condition M2 of the EPL outlines the requirement to monitor surface water discharges from Karuah East Quarry via the three licensed discharge points (LDP001, LDP002, LDP003). The *Statement of Commitments* (Appendix 6, PA 09_0175) requires additional surface water monitoring to be undertaken for the first twelve months of operations. This additional water monitoring requires monthly sampling to be undertaken at the three licensed discharge points and at four locations on Yalimbah and Bulga Creeks when in flow.

All discharged water from the three licensed discharge points are required to meet the water quality concentration limits as stipulated in Condition L2.4 of the EPL. This criterion is shown in **Table 14** below.

Table 14 Surface Water Discharge Monitoring Criteria

Sampling Points	Pollutant	Unit	EPL Limit
LDP001 (Dam 1)	pH	pH units	6.5 – 8.5
LDP002 (Dam 2)	TSS	mg/L	40
LDP003 (Dam 3)	Oil & Grease	mg/L	5 and/or none visible

5.1 Discharge Monitoring Results

There were no discharges during the month of February 2019.

5.2 Monthly Monitoring Results

Monthly water sampling was undertaken on the 16 February 2019. All creek lines were found to be dry at the time of monitoring.

Summary of monthly monitoring results is shown in **Table 15** and **Table 16**.

5.3 Surface Water Results Summary

Due to the dry conditions, all creek lines were dry during February 2019 and dam levels were found to be lower than normal. As such, discharges from the sediment dams did not occur during the month.

6. GROUNDWATER MONITORING

Groundwater monitoring is undertaken to meet the *EA Statement of Commitments* (Appendix 6, PA 09_0175) and Section 8.2 [Water Management Plan \(SLR, 2015\)](#). Groundwater levels are monitored quarterly and water quality biannually at four groundwater monitoring bores (piezometers). Details of this monitoring program is shown in **Table 17**. Refer to Appendix 1 for piezometer locations.

Table 17 Groundwater Monitoring Program

Piezometer	Location	Water Level monitoring frequency	Water Quality monitoring frequency
¹ BH205	Lot 13/DP1024564	Quarterly	Biannually
² BH207	Lot 13/DP1024564	Quarterly	Biannually
BH208	Lot 21/DP1024341	Quarterly	Biannually
BH303	Lot 21/DP1024341	Quarterly	Biannually

Note: 1. Piezometer BH205 was relocated approximately 30m to the west on 13 March 2017
2. Piezometer BH207 was relocated approximately 60m to the north on 26 September 2016.
