1. INTRODUCTION

This report has been completed to meet the requirements of Section 66(6) of the *Protection of the Environment Operations Act 1997* and the NSW Environmental Protection Authority's (EPA) Requirements for Publishing Pollution Monitoring Data (October 2013). This report summarises the required monitoring data under Environmental Protection Licence (EPL) 20611 for the Karuah East Quarry. This report also includes some monitoring requirements under Project Approval 09_0175 and the approved Statement of Commitments (SoC).

A summary of the environmental data for May 2018 is covered in this report.

A summary of the licence information is provided in **Table 1** below.

2. DUST MONITORING

There are no specific dust criteria listed in the EPL, but the dust criteria (Tables 2-4) are listed in Schedule 3 Condition 13 of Project Approval 09_0175.

Table 2 PA 09_0175 Long term impact assessment criteria for particulate matter

Notes to Tables 2-4:

All dust monitoring is undertaken in accordance with the *Approved Methods of Sampling and Analysis of Air Pollutants in NSW* (EPA, 2007).

Dust deposition and TSP/PM $_{10}$ monitoring is undertaken at Karuah East Quarry at the locations listed in **Table 5**.

¹ Total impact (ie incremental increase in concentrations due to the project plus background concentrations due to all other sources).

² Incremental impact (ie incremental increase in concentrations due to the project on its own).

³ **Deposited dust** is to be assessed as <u>insoluble solids</u> as defined by Standards Australia, AS/NZS 3580.10.1:2003: Methods for Sampling and Analysis of Ambient Air – Determination of Particulate Matter – Deposited Matter – Gravimetric Method.

⁴ Excludes extraordinary events such as bushfires, prescribed burning, dust storms, sea fog, fire, incidents, illegal activities or any other activity agreed by the Secretary in consultation with EPA.

2.3 Dust Monitoring Results Summary

All dust monitoring results to the end of May 2018 indicate that the Dust Deposition (Insoluble Solids), TSP and PM10 levels recorded were below the project criterion.

3. BLAST MONITORING RESULTS

The conditions stipulated for blasting is referred to in Condition L5 and M7 of EPL 20611 and Schedule 3, Condition 8 of PA 09_0175. Blast monitoring is undertaken at every blast. **Table 8** summarises the blast monitoring criteria.

Table 8 Blasting criteria

Location	Airblast overpressure (dB(Lin Peak)	Ground vibration (mm/s)	Allowable exceedance
Any residence on privately-owned land,	120	10	0%
or any public infrastructure	115	5	5% of the total number of blasts over a period of 12 months

Summary of blasting results are shown in Table 9.

Table 9 Blast Monitoring Results

Date and time	Overpressure and vibration	Location B (Nearest Residence)
10/05/2018	Overpressure dB(L)	Below detection limits
12:30 PM	Vibration (mm/s)	Below detection limits

As shown in Table 9, one blast was undertaken during May 2018. Monitoring results indicate this blast was below the EPL limits for overpressure and vibration at Location B. This blast was below the set minimum trigger levels. The set minimum trigger levels for this blast were 0.37 mm/s for vibration and 108 dB(L) for overpressure.

4. NOISE MONITORING

Schedule 3 Condition 3 of the Project Approval and Condition L4.1 of the EPL requires Karuah East Quarry to ensure noise generated by Quarry operations does not exceed criteria outlined in **Table 10**.

Table 10 Operational Noise Criteria (dB(A) LA_{eq(15min)})

Location	Criteria (¹day)
Residence on Lot 11 DP 10244564	43
A	40
В	37
G	38
All other residence	35

Note ¹: A day is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sunday and Public Holidays.

The noise criteria shown in Table 10 is not indicative of the construction noise criteria for the Karuah East Quarry project. Construction noise criteria has been developed based on the NSW EPA Interim Construction Noise Guideline for each location and is set out in Table 9 of the approved Noise Management Plan (SLR, 2015).

In accordance with Schedule 3 Condition 5 and Condition 7 of the Project Approval and the Noise Management Plan (SLR, 2015) a noise monitoring program has been implemented. Summary of this monitoring program is outlined in Table 11.

- **Note:** 1. Monitoring locations are shown in Appendix 1.
 - 2. Criteria is for daytime limits. Daytime is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sunday and Public Holidays.

4.1 Operator Attended Monitoring Results

The results of the operator attended noise surveys are presented in **Table 12**. Ambient noise levels given in the tables include all noise sources such as traffic, insects, birds, adjacent quarry and Karuah East Quarry. The table provides the following information:

- a) Monitoring location and serial number of the noise logger;
- b) Date, start time, Wind velocity (m/s) and Temperature (°C) at the measurement location; and
- c) Typical maximum (LAmax) and contributed noise levels.

Quarry contributions listed in the tables are from Karuah East Quarry and are stated only when a contribution could be quantified.

4.3 Noise Monitoring Summary

The attended noise monitoring that was conducted on the 17 May 2018 shows that the Karuah East Quarry was not audible at location F but was audible at location G. The Karuah East project estimated noise contribution at location G was found to be above the limits of 38 dBA (LAeq 15 minute) as per the Project Approval and the Environmental Protection Licence for the Karuah East Quarry.

However, the results for the unattended noise monitoring indicate that background noise levels contributed largely to overall noise levels at Location G. Noise levels during the non-operational hours were around 45dBA (LAeq).

5. SURFACE WATER MONITORING

Condition M2 of the EPL outlines the requirement to monitor surface water discharges from Karuah East Quarry via the three licensed discharge points (LDP001, LDP002, LDP003). The *Statement of Commitments* (Appendix 6, PA 09_0175) requires additional surface water monitoring to be undertaken for the first twelve months of operations. This additional water monitoring requires monthly sampling to be undertaken at the three licensed discharge points and at four locations on Yalimbah and Bulga Creeks when in flow.

All discharged water from the three licensed discharge points are required to meet the water quality concentration limits as stipulated in Condition L2.4 of the EPL. This criterion is shown in Table 13 below.

Table 14 Surface Water Discharge Monitoring Criteria

Sampling Points	Pollutant	Unit	EPL Limit
LDP001 (Dam 1)	рН	pH units	6.5 – 8.5
LDP002 (Dam 2)	TSS	mg/L	40
LDP003 (Dam 3)	Oil & Grease	mg/L	5 and/or none visible

5.1 Discharge Monitoring Results

A controlled discharge was carried out on the 7, 8 and 16 May 2018 at Dam 2 (LDP2). An uncontrolled discharge event occurred on the 14 and 15 May 2018 from Dam 1 (LDP1) due to heavy rain.

Discharge monitoring results shown in **Table 15** and **Table 16** below.

5.3 Surface Water Results Summary

Dams 1 and 2 discharged during May 2018. Two (2) controlled discharges occurred at Dam 2, whilst Dam 1 had a single uncontrolled discharge over two days due to a rain event. The discharge monitoring showed that the pH was slightly below the EPL criterion on 14 May for Dam 1 and 8 May and 16 May for Dam 2. However, the pH level was not lower than the pH in the receiving creeks.

The Total Suspended Solids during the uncontrolled discharge event from Dam 1 exceeded the EPL criterion on 15 May 2018 by 8mg/L. However, the water sampled downstream from Dam 1 at monitoring location SW2 showed the Total Suspended Solids did not exceed 22mg/L during this discharge event.

6. GROUNDWATER MONITORING

Groundwater monitoring is undertaken to meet the *EA Statement of Commitments* (Appendix 6, PA 09_0175) and Section 8.2 <u>Water Management Plan (SLR, 2015)</u>. Groundwater levels are monitored quarterly and water quality biannually at four groundwater monitoring bores (piezometers). Details of this monitoring program is shown in **Table 18**. Refer to Appendix 1 for piezometer locations.

Table 19 Groundwater Monitoring Program

Piezometer	Location	Water Level	Water Quality
		monitoring frequency	monitoring frequency
¹ BH205	Lot 13/DP1024564	Quarterly	Biannually
² BH207	Lot 13/DP1024564	Quarterly	Biannually
BH208	Lot 21/DP1024341	Quarterly	Biannually
BH303	Lot 21/DP1024341	Quarterly	Biannually

Note: 1. Piezometer BH205 was relocated approximately 30m to the west on 13 March 2017

2. Piezometer BH207 was relocated approximately 60m to the north on 26 September 2016.
